A common error so many people make is believing that acquiring more money, or anything else for that matter, is what life is about. *But life is about the business of the cosmos, which means creating order and beauty.*

As we focus on the experience and creation of more order and beauty in our life, guided by our feelings, all the elements we need to experience a more beautiful life show up, seemingly by grace. In other words, we create a *cosmos* of our life – the word *cosmos* means “order and beauty”.

The Tarot science of creating a beautiful life:

Keys 21 + 16 + 0 + 19 + 21 = 77 = 14 (practice in daily life makes you stronger = 5 (listen to the inner voice for guidance along beauty’s path

Key 21: The World: We are practicing godlings, learning how to create a cosmos (order and beauty)

- The greater the challenges, the more intense the chaos, the greater our opportunity to develop this ability.
